

ENEOS Super Multi Gear 80W90

Transmission Fluid / Gear Oil for Hypoid Gears & Hub reductions

ENEOS Super Multi Gear 80W90 is high performance gear oil formulated using the latest sulphur-phosphorus technology, which assures excellent protection of the gears against metal-to-metal contact under the most severe conditions, even under shock-loads. This Oil contains special additives leaving a protective film upon the surfaces to prevent corrosion and wear. Due to its adjusted viscometrics, these oils can be applied in cold conditions (see pour point). This Oil is recommended for use in bevel, spiral bevel and hypoid gear type differentials (either single or double reduction) and in power dividers where API GL-5, MIL-L 2105D and Mack GO-G is specified.

FEATURES & BENEFITS

1. Superior oxidation and thermal stability

This Oil shows a superior oxidation and thermal stability and has a good resistance against foaming. Even at higher temperatures an effective lubricating film thickness assures proper lubrication.

2. Excellent Resistance for Wear, Corrosion, Foaming and Oxidation

This Oil shows an excellent resistance against wear, corrosion and foaming as well as oxidation and ageing at elevated temperatures.
