Product Information

ENEOS PRO-Sport 10W-60

Ultra Performance Race & Rally Engine Oil

ENEOS PRO-SPORT 10W-60 is the ultra-performance, advanced and fully-synthetic engine oil engineered using technology allowing increased power, torque and efficiency of high performance and sports engines, which can work harder and under extreme high pressures. This oil uses high performance base oils to be able to maintain strong, long-lasting oil film to keep metal engine components apart at the same time providing optimal lubrication and friction reduction in most extreme race and rally conditions. This motor oil is tailored to meet most demanding requirements of modified engines tuned for motorsport competition. This oil will also satisfy needs of drivers who are looking for advanced technology motor oil that offers improved performance, protection and engine life. It provides superior wear and corrosion protection, including bearing protection under extreme performance. ENEOS PRO-SPORT 10W-60 enables best engine performance and endurance, and it is built for everyday use on the road as well as during track-day – under extreme pressures created in supercar engines. ENEOS for long time has been one of leading suppliers with a great heritage of engine oils for motorsports delivering the ultimate performance. ENEOS PRO-SPORT 10W-60 can also be used in older vehicles with high mileage requiring high viscosity motor oils.

SPECIAL FEATURES

1. Fully-Synthetic Sports Performance Motor Oil

ENEOS PRO-SPORT 10W-60 high viscosity oil has been engineered to provide superior protection of an engine at its full operating temperature. Designed for high performance, high pressure engines thanks to its advanced full synthetic formulation and use of ultra-high performance additives that maintain their lubricating characteristics under extreme pressures. This oil gives the driver confidence to push the engine to its maximum performance exactly when needed and without fail. It offers maximum engine response and protection during extreme driving conditions and temperatures. It supports delivering a sustained, maximized horsepower

2. Long Engine Life

Thanks to its ultra advanced composition, this oil will guarantee a long lasting protection in higher mileage engines for long life of the car. It helps prevent oil leaks and offers high cleaning characteristics. Its high viscosity helps reduce oil burn off in older engines.

3. Ultimate Protection

By using polyalphaolefins (PAO) synthetics this oil provides strong film that is resistant to 'shear' and viscosity loss under high stress, reducing friction and enhancing performance of the oil.

RECOMMENDATIONS & SPECIFICATIONS

- ACEA A3/B4

APPLICATION

Designed for both petrol and diesel competition engines for long distance racing, rallying in both normally aspirated as well as turbocharged engines. Engineered for racing applications in competition and in modified engines. Suitable also to provide the extra protection in older engines (gasoline and Diesel) without Diesel Particulate Filter.

PACK SIZES

1L, 4L, 60L

TYPICAL PROPERTIES

SAE viscosity grade	10W-60
Density (20°C), g/cm^3	0.85
Flash point (COC), °C	245
Kinematic viscosity (40°C), mm^2/s	160
(100°C), mm^2/s	22.6
Viscosity index	170
Pour point, °C	–42.0
HTHS Viscosity (150°C), mPa.s	5.60
TAN mgKOH/g	2.40

Note: The above typical properties may be changed without notice.
